

Group	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	
Period																			
1	1 H																		2 He
2	3 Li	4 Be																	
3																			
4																			
5																			
6																			
7																			
*Lanthanoids																			
**Actinoids																			

Table of the elements at T = 15 minutes

Note: At T=380,000 years neutral atoms form and ${}^7\text{Be}$ decays to ${}^7\text{Li}$ by electron capture with a half life of 53 days.
